BOARD REVIEW
COURSE

Chicago

February 3-4, 2012

Whether you plan to
take the **ABOI/ID Board
examination**
or simply want to
update your implantology
knowledge,
this **TWO-DAY**
program is for you ...

Co-Sponsored by
the American Academy of Implant Dentistry

COURSE SPEAKERS

James L. Rutkowski, DMD, PhD, is a Diplomate and past President of the American Board of Oral Implantology/Implant Dentistry, a Fellow of the American Academy of Implant Dentistry and Editor-in-Chief of the Journal of Oral Implantology.

Dr. Rutkowski maintains a successful implant practice in Clarion, PA and is a graduate of the Duquesne University School of Pharmacy (1972) and the University of Pittsburgh School of Dentistry (1976), he received his PhD degree in Pharmacology/Toxicology from Duquesne University in 2008.

Aladdin Al-Ardah, DDS, MS, is a Diplomate of the American Board of Oral Implantology/Implant Dentistry, and an Associate Fellow of the American Academy of Implant Dentistry.

Dr. Al-Ardah is an Associate Professor for the graduate program in implant dentistry at Loma Linda University School of Dentistry. Dr. Al-Ardah is also a consultant and expert in the fields of advanced implant surgery, bone regeneration and implant prosthodontics. In addition to his expertise nationally and internationally, Dr. Al-Ardah maintains a faculty practice in implant dentistry at the Center for Implant Dentistry at Loma Linda University as well as performs implant related procedures in multiple offices in his area.

Synopsis:

This program will provide you with up to date and scientifically proven information relating to implantology today. Additionally, you will be provided the tools needed for critical thinking related to patient treatment from start to finish.

Prior to attending this course you will be provided pre-program reading materials so that you are prepared to not only learn from experts in the field, but also discuss subjects that are commonly or not so commonly found in patient care/treatment in your office.

If you are currently applying to take the ABOI Board Certification exam, you may find this course to be an excellent preparatory opportunity.

Program Learning Objectives

At the conclusion of this program, participants should be able to:

- Understand state of the art surgical considerations for predictable and effective treatment
- Assess common patient data collection to help develop a treatment plan that will address the patient's needs and desires
- Discuss how pharmacology can impact patient care
- Develop a comprehensive understanding of how a patients medical history and medications can play a significant role in case outcomes (positive and negative)
- Determine which prosthetic treatment plans will produce a positive long-term prognosis
- Understand anatomical factors that can hinder a case surgically and how to remedy those types of cases effectively
- Predict which hard and soft tissue grafting techniques will produce the optimal outcome
- Evaluate and develop criteria to determine how best to treat an ailing or failing implant
- Compare and contrast different ideologies from different dental implantology philosophies
